General Comment

I object to any and all uses of generative AI. Not only is it based on outright theft from copyright holders, it also has been repeatedly proven to be factually incorrect the vast majority of the time, which contributes to the spread of misinformation and creates a dangerous setting for all people.

More importantly, it's been proven that generative AI is reliant upon exploited labor of those who are already marginalized, and its use of energy resources is set to hasten our climate's demise.

All of these reasons are excellent for refusing to allow it to continue in any way, and I can't urge you strongly enough to reject these companies' bids to continue to exploit and harm people and our planet while creating chaos with lies and misinformation.
