General Comment

As the Lead Organizer of Raleigh Independent Game Developers, I feel that I have a responsibility to oppose the proposals set forth in the action plan which would concern copyright infringement.

Simply put, sheltering AI companies from copyright infringement incentivizes them to directly plagiarize copyrighted material.

This copyrighted material such as games, movies, music, television shows, and other media, represent trillions of dollars annually in the global market. If Open AI is shielded, these investments will depreciate as the market is flooded with illegal copies.

It's very simple: Sam Altman has a financial incentive to lie about his intentions, and indemnification of any kind is inappropriate because it would allow the wholesale theft of my and my client's valuable intellectual property
