General Comment

The protection that Executive Order 14110 provided the people of the United States was one that had the people's best intentions at heart. Ultimately the ones who are responsible for the United States government's existence are the people and its government should be for the people. It is insulting that our governing powers would so easily revoke protections for our people for a technological arms race whose basis relies on foreign nations being entities of evil or directly antagonistic to the United States and it sends a message to those people of those nations that we use them as an excuse to allow our government to do anything in the name of a cold war that most Americans will never experience the effects of unless they are directly cause their own government. Crypto has been used almost entirely for scams and grifts in the recent years even by our own president and should NOT be taken seriously by our governing body. I hope that there are those in our government who will listen to it's educated citizens and hear past the screams of its frustrated victims of the conservative propaganda machine and will stand for the people who want a country that serves them instead of those who seek to abuse them.
