General Comment

AI steals from Americans and can not create anything without doing so. If I can go to jail for theft, the companies and individuals creating and supporting these systems should face the same consequences for taking others' hard work without permission or providing compensation; companies are people as decided by the law, and they should have to behave and be treated accordingly.

Giving special privileges to these companies will have and has already had a negative effect on artists, musicians, actors, animators, and a whole host of others that will potentially destroy livelihoods and careers if allowed to go through. You claim to love working Americans, so it's time to act like it and protect their intellectual property from this mass theft machine.
