General Comment

Hello National Science Foundation

As a concerned citizen of the United States, I and my fellow citizens fear that AI will be nothing short of disastrous for this nation. We do not want to see AI take over everything from government to private business, nor do we want to see it stealing from our own personal data or creations. AI infringed on copyright and steals from livelihoods of thousands. This should not be allowed to stand, especially in businesses and corporations. AI in its current state is detrimental to the United States and, as such, should not be given more data as a means of creating a temporary solution. I and my fellows implore the Foundation to not follow through with this plan. The complete destruction of property cannot be permitted in this country.
