Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

As a self-taught artist, as a crafter, as an artisan, I've honed my work over decades. It's my love and life and business. I expect anyone who wants to use my work to contact me to state intent and ask for permission, while accepting my response. "AI" certainly would not do that. No permission has been or will be given to scrape my work to train algorithms that pretend creativity when their true purpose is to steal and remix with no intent, no effort, no heart. It's an insult on top of thievery.

Technology, like any tool, is as good as the people using it, as good as what it's used for. I'm seeing an art-stealing, environment-ruining, soul-sucking endeavor that continues to pretend it's profitable while destroying the intellectual property and livelihoods of the people it's stealing everything from. Doesn't particularly speak highly of the people designing or using it, frankly.

Thank you for the opportunity to comment.
