General Comment

My name is Scott Kolp, and I am a writer from Studio City, CA. I'm writing to express my firm conviction that any executive action regarding artificial intelligence should safeguard the culture of innovation that has made America great. American creators of all stripes — from scientists to painters — are able to be the best in the world because of their access to free markets. Giving big tech companies unfettered access to the material these creators produce, without due compensation, will chill the creativity of America. In doing so, the United States could quickly cede its worldwide lead in the arts, sciences and letters. You would not give the natural resources of the United States to some company to use for their own exclusive use; why would you do the same for tech companies looking to exploit the United States' most valuable resource: it's citizens. Thank you for the opportunity to comment.
