General Comment

I say no to AI being used to steal from people protected under copyright. OpenAI being immune from being sued for using other people's work to train their model. AI being used in this way not only harms individual artists and small businesses, but it will also harm bigger businesses, as all of their creative ideas will be stolen to feed a machine that can spit out stuff without giving them credit. People would struggle to want to buy stuff from real businesses if AI was used to make the stuff they make. Doing this will make copyrighting anything almost useless as there will be no consequences for AI companies like OpenAI who steal copyrighted work and can get away with it. Do not allow this to happen!
