## General Comment

I do not think AI in its current state should be made a priority by the US federal government. Many companies promoting or developing AI, are basing their models on the hard work of others, or copyrighted material.

In addition, AI models used for assistance in daily activities are not up to par. Misinformation is used as a lazy method of research, or misleading people into believing false documentation as facts.

I hope you take my opinion into consideration before you enforce the Artificial Intelligence Action Act. Thank you.
