## General Comment

The "AI" that's being pushed on us is barely artificial intelligence at all. It's all Large Language Models that just chew up whatever information is fed to them and spit it back out as plagiarized work, inaccurate statements, or false imagery that can be used to easily spread disinformation or libel. Anything it can do that is deemed "necessary" can already be done by existing technology. This false AI also wastes large amounts of resources. It is not the way of the future. It is merely a scam being pushed on us by snake oil salesmen masked as technology enthusiasts. Despots are also waiting to use this technology to control information and elevate their own sociopolitical power. We should be shutting this down everywhere.
