General Comment

This is a very dangerous plan and should not be carried out. Giving tech companies carte blanche to the creative and academic works of this country and the world so that they can make money off of others (while giving *nothing* back) is bad enough, but valid, non-destructive uses for this technology are minimal while the opportunities for abuse are manifold.

We're already in a world where we let AI (which simply MAKES THINGS UP) determine where to send drones to kill people; imagine if we apply this to everything else.
