General Comment

Aside from the fact that so many of the parties that push 'AI' so hard are a bunch of grifters seeking to fleece as many people for as much money as possible for their own gain, the idea that "barriers" to the development of 'AI' should be removed is ludicrous. It's as if you're actively saying "Hey, we should be able to do whatever the heck we want regardless of the legality because that way we get to make more money."

People over profits. I know that's a hard sentiment for some to get their heads around but these blatant efforts to stifle real creativity and hamstring actual creative peoples is disgusting.
