General Comment

AI/Generative AI will be the end of everything in terms of creative freedom and human ingenuity. Legalizing wide scale theft for big business sake will be one of the very first steps in the beginning of true death of the American dream. It will kill the arts, it will kill freedom of expression, and it will slowly kill off other industries. This is not progress, this is one of the worst large scale grifting schemes ever conceived that has dangerous consequences that will be felt for years to come by multiple generations.
