General Comment

AI is not above the law. No one and no technology is above the law. Copyright or otherwise this would set a chilling precedent.

We cannot allow this to happen. It will erode protections of all kinds as well as humanity itself. What we don't use, we lose. Problem solving and creative thinking included.

Do you really want AI to become so prevalent that medical students can use it? That law students can? To pass their exams?

This is a step in that direction. We must protect ourselves in all ways. Copyright protections must be upheld!
