General Comment

I do not believe AI holds a place in the future of the US

AI steals from my livelihood as an American and profits off of theft

AI is overhyped and is fleecing the eyes of the American public.

AI is a terrible way for corporate America to cut back on its hours and pay wages to further increase the profits of the rich and elite. Unless you also plan to find a way to make this country more affordable to live in including healthcare, housing, and basic necessities. You in no way should be developing an AI system that is ultimately going to leave more Americans struggling in their every day lives.
