General Comment

I am a US citizen and a 28 year old professional artist, author, and researcher in biological sciences. I am astounded that this is even a discussion and that there was NO announcements regarding this disgusting overstep of AI's abilities, yet I must spend time voicing my strong opposition to any leeway given to OpenAI. I am fully against OpenAI having any immunity, protection, or any other forms of special treatment in regard to copyright violation. As it stands, OpenAI's current practices amount to theft of intellectual properties owned by real artists, writers, and other IPs. If the government further empowers OpenAI to steal more data with this proposed resolution and act by Sam Alton and his company, then there is no longer any protection for creators and creative works such as art, writing, and so on.

OpenAI should not be allowed to further operate in this manner and should NOT be further empowered to fuel the greed of those it will never benefit. They must be regulated or removed entirely. To whomever reads this, let it be known that I am a US tax paying and law abiding citizen who had always stood, and will always stand, against the corrupt overstepping of AI companies, both private and federally funded. The abuse of artists, authors, researches in not only the arts but also the sciences can no longer stand and must end immediately.
