General Comment

AI is terrible for a multitude of reasons, more so in the hands of a government that does not care about consequences. Mistakes will be made using AI services that will kill hundreds if not thousands of people. Machine Learning can never and will never replace the need for actual human intervention and thinking.

That doesn't even touch on the fact AI is a waste of finite resources and is quite frankly a poor, erratic product that does not accomplish what it sets out to do in the first place.
