General Comment

This will not bring a brighter future for all Americans. All it will bring is far more struggles for the everyday working man as prices for electricity surge due to the amount required by the data centers to power AI. Billions of dollars have already been poured into AI research and development- and there have been no significant gains at all within the past year to the point where OpenAi is operating at a lost. The Ai bubble is bursting and there is no reason to continue down this foolish path when Americans are already struggling to provide for their own families.
