General Comment

I strongly oppose the protection and expansion of AI. The use of AI steals the livelihoods of American citizens when companies believe they can cut corners by using this highly volatile tool. AI is trained on the intellectual property of others and often outputs results that are low-quality and often inaccurate.

When we let AI use become common, we signal that we as a nation condone and are comfortable with low-quality, second-hand results that stomp over our own citizens. Please consider opposing AI for the sake of us all.
