General Comment

AI, to begin with, takes stark advantage of a lack of regulatory action on the part of the artist to protect their work to train their data and put out low effort clones of existing IP.

To allow this plan to move forward is to cosign the naked theft of original properties and endanger the livelihoods of hundreds of thousands of Americans, at ridiculous energy consumption that has all but crippled communities unfortunate enough to be host to a data center, all to satisfy the interests of corporations that do not wish to fairly compensate their talent and are willing to worsen the quality of life and art for and destroy the financial livelihoods of the American people so long as their fiscal quota is met.

It is my deepest hope that conscience finds those with the power to kill this plan do so expeditiously.
