General Comment

The restrictions put in place by the prior administration were made to protect us, and by removing those restrictions the government seeks to remove our negative rights and allow others to invade our right to privacy. The right to privacy has been protected by the 9th Amendment since the founding of our government, and the training data that AI companies are trying to use is protected by it. Additionally, the Constitution also protects our copyrights, which AI completely ignores. Please, keep restrictions on AI so that our rights may be protected.
