General Comment

AI is a technology based on theft. Theft of livelihood of artists, theft of human connection and condition. Ripping off ideas, images, language put forward by real thinking minds in order to produce empty and derivative content just to maximize a profit is short-term thinking. It will lead to fewer jobs, hollow culture, and less innovation. It will leave no legacy for the future, and it will ruin lives now. To allow the plagiarism of works of not only individuals but creative corporations is stealing. Intellectual property is property, and using copyrighted works without permission and appropriate compensation is theft. AI holds no place in the future of a thriving nor even functioning United States.
