White House AI Action Plan Comment Letter

March 14, 2025

From:
A Concerned DLA Contractor

Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

The AI systems made by Big Tech companies like OpenAI (Microsoft) and Google threaten to destroy thousands of American small businesses which rely on human creativity and output with their recent demand to create special carve outs in copyright law.

AI systems can only be produced by first training on work made by people. It does not create something from nothing, nor does it merely take inspiration. The work of hundreds of thousands of other everyday American creators is instead taken and fed into these AI systems without consent or any compensation. It is the most un-American practice I can think of. It is destined to eat itself, in the end, as artists are pushed out of the market by it, leaving itself with nothing new to copy, but the stolen works of other AI.

The purpose of American copyright law is to protect the incentive to create and innovate.

Do not create new copyright exemptions that allow Big Tech companies to exploit and steal from creators and everyday Americans without permission, compensation, or transparency.

This administration's AI Action Plan should focus not on giving away creator content to Big Tech companies, but rather on ensuring a fair marketplace with competition:

- First, the government should ensure that creators and everyday Americans give effective **consent**, so that we can decide when and where our work is used by AI systems.
- Second, the AI Action Plan should encourage a robust **licensing** marketplace, so that the incentive to create for small businesses is preserved. Artist's work has immense economic value, so the value generated by that work should accrue to the original creators, not just Big Tech.
- Finally, the AI Action Plan should require **transparency** from Big Tech companies, requiring them to disclose what material is in their training datasets, and label what content is AI generated.

I am not anti-technology or anti-AI. In fact, I work in and around both these fields. It is, in fact, exactly for dealing with it first hand that pushes me to reject such legislation around it.

Thank you for reading. Know that, even if not every word was strictly my own, I mean every bit of it all the same.

Please make the right choice.
