General Comment

Generative AI has no place in America. It steals and exploits the work and ingenuity of the American people all so that these corrupt, immoral pieces of machine learning algorithms can spit out mundane piles of plagiarist, derivative garbage. It hurts the American people, and we do not want it.

It is a dangerously overhyped, nonsensical mass of utter drivel that is draining resources at an alarming rate and it will never offer anything to anyone.

Generative AI is theft on a global scale. If a business cannot operate, if it cannot function without violating the American people, then it does not deserve to exist. It must die.
