General Comment

I am a writer, and a US citizen since the day I was born.

"AI" does not, can not, have a future in this country.

What the notice refers to as "AI" is not a technology that serves the common good so much as an all-purpose marketing brand running cover for destructive scams.

The current implementation of these technologies, in the extent that they even exist, is inherently immoral and a violation of copyright law.

This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution. However, I do not give permission for this document to be fed to an "AI" database or program. I should not need to say that. But that is the position you have put for us.

Thank you for your time.
