General Comment

This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be

reused by the government in developing the AI Action Plan and associated documents without attribution.

The simplest and best thing to do for "Artificial Intelligence" policy is to ban it, categorize anything made with it as public domain, and rigorously pursue technologies that verify content is genuine.

Without policies of this kind, we are preparing United States society to have false information that has the appearance of being real but only has many dangers associated with it.
