## General Comment

I do not approve of tech companies being able to steal copyrighted work under any circumstance. AI will only serve to allow corporations to steal jobs from hard working middle class families, while offering sub par replacements that will ultimately destroy whatever industry it touches. Intellectual property and the ability for creatives and workers to have ownership and choice of use over their hard earned concepts and creations is the backbone of the creative industry and allowing AI to thief and steal without compensation or consent will only serve to ruin our economy as people are dumped out of jobs. AI is too expensive, too damaging to the environment, and gives little in return to make it worth the cost. Please do not allow AI companies to steal the hard work of individual workers.
