General Comment

Copyright laws have been in place for a long time and have been getting trampled on more and more over time, this is just another attempt to do so. *I do not believe this is a good thing* and allowing AI to violate it is simply another attempt to make copyright have less regulations yet again.

Please, for the love of god, do not let this go through! We have enough examples of this going poorly that trying to go around it yet again will only end badly.
