General Comment

From:

Gary Thompson

Baltimore, Maryland

Dear Sir or Madam,

Copyright is a system that was designed to protect the rights of people and to encourage innovation of people. Neither a computer nor a program nor an algorithm is a person. AI can not create. It can not innovate. It can not transform. It can only derive. It plagiarizes to create a product. Just because it plagiarizes thousands of times to make a product does not negate the fact that it plagiarizes.

The people who created the works AI derives from are entitled to control their work fundamentally. A computer can not create. There is no room for discussion.

Thank you for your time.
