General Comment

To whom it may concern--

I want to echo the many voices commenting their concerns with an "AI at all costs" approach; we are giving private, self-interested groups unfettered access to profit off of the creative works of many hardworking Americans, and for what? To consolidate all that money (and therefore, power) at the top? We need to establish a system that makes sure that the path forward with AI does not pervert the flow of money and power in our society; money should flow back to the common American, and these tech firms hoard money for themselves and their investors.

"AI at all costs" is not an issue of national security, it's an anti-American power and money grab by these AI companies at the American peoples' expense. We cannot allow this.
