General Comment

So this new proposal is essentially asking us to supply our work to Google and OpenAI for free, without compensation. There are many words for that: theft, slavery and communism are among them. In the reverse scenario where we would be allowed to take from these companies' data, it would be called digital piracy.

Google and OpenAi do not have the interests of the American people or that of national security in mind. They will actively undermine the government and will stifle all creativity and innovation killing the free market and capitalism as we know it.
