General Comment

I am a freelance artist and illustrator who has dedicated my life to developing this extremely specific skill. AI is an actual scourge upon the earth, possibly the most frightening and soulless invention after the atomic bomb. The role of an artist is to help society expand its ability to think, and the role of AI is the opposite - it is draining us of our ability to understand, imagine, dream and create. I know the federal government looks down on such pursuits, but it turns out they are kind of important for a functioning society/the human race. Down with AI, it will destroy the human mind.
