General Comment

Instructions on submitting for the “Request for Information on the Development of an Artificial Intelligence (AI) Action Plan” by the National Science Foundation

Thank you for taking the time to submit your public comment! Comments must be submitted by 3/15/2025 by 11:59 pm EST!!

Copy the letter found on two pages after this page into a new text document.

Fill in the appropriate sections for [YOUR NAME], [YOUR PROFESSION], [YOUR ADDRESS] near the top of the letter, or remove those if you intend to submit anonymously.

Feel free to use the letter as is or adjust it to your preference, or write your own.

Export your document as a PDF, DOCX, or similar.

Go to this URL: <https://www.federalregister.gov/documents/2025/02/06/2025-02305/request-for-information-on-the-development-of-an-artificial-intelligence-ai-action-plan>

Click the green “SUBMIT A PUBLIC COMMENT” button near the top of the page.

Under “Upload File(s)” click the green button “+ Add a file” and attach your exported document. The “Comment” field will now say “See attached file(s)”.

You are not required to put your email address in the “Email” field, but do so if you want to track your submission.

Select an option under “Tell us about yourself: I am”: if you are submitting as just yourself select “An Individual”. You may also choose “Anonymous”.

If you selected “An Individual”, put in your first and last name in the respective fields, you are not required to fill out any more information. Check the box “I read and understand the statement above” which acknowledges that any personal info you included will be viewable on the web.

You may preview your comment to double check everything by clicking “Preview Comment”.

Click the green “Submit Comment” button.

You’re done! Please submit by 3/15/2025 by 11:59 pm EST.

Re: National Science Foundation’s Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I am an American who has worked over 15 years in the field of data transformation. Of late I have grown increasingly concerned with the tech industry’s push towards Generative AI, a technology with limited applications that is being sold as a universal solution to all manner of problems, both real and invented. As yet these technologies have produced remarkably little in the way of returns, and I would caution against any Action Plan that is overly committed to what may well turn out to be a speculative bubble akin to the dot-com crash of the late 90’s.

Working as I have in the field of data transformation, there is nothing more important than maintaining the integrity of data. Generative AI applications arbitrarily reassemble data with little regard for consistency, based on obscure heuristics. Under no circumstances would I trust any data output by GenAI software without verifying it first. Without doing so, the risks of data corruption or leakage cannot be overstated. It is a gamble that whatever damages are incurred (e.g. wasted resources due to inaccurate data, Americans' personal data or classified information being leaked) will be less than the salary of qualified programmers and technicians. History shows this is not the case.

GenAI does have narrow applications in certain fields outside my own; I will leave discussion of that to others. My concern is that GenAI has not proven to be the golden goose big tech expects, and that they are now looking to subsidize their costs by cannibalizing as much intellectual property, data, and jobs this administration is willing to allow them. As the custodian of my tax dollars I ask that you seriously consider the long-term effects of this investment for the American people.
