Response - AI Action Plan

March 15, 2025

From:
Tracy Butler
Comics Author/Animation Art Director

Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I am an American producing comics and animation, and a contractor and director of numerous other American artists who make a living doing similar work. I have worked extremely hard for years to develop the skills and knowledge to build my business, and to earn the opportunity to do what I'm doing.

The AI systems made by Big Tech companies like OpenAI (Microsoft) threaten to destroy thousands of American creative ventures like mine with their demands to upturn or bypass copyright law and to simply steal all of our hard work for their datasets.

The purpose of American copyright law is to protect the incentive to create and innovate.

If we the American people do not own our creations, and everything we put online will be stolen by Big Tech giants, what will be the incentive to create? If everyday Americans create a new innovative piece of computer code, a new illustration, a new webcomic, a new visual design, or a new piece of music only to have it immediately stolen by Google and Microsoft, why bother creating it in the first place? How will we possibly make a living doing these things?

Want to protect American innovation? Protect American creators. **Do not create new copyright exemptions that allow Big Tech companies to exploit and steal from creators and everyday Americans without permission, compensation, or transparency.**

This administration's AI Action Plan should focus not on giving away creator content to Big Tech companies, but rather on ensuring a fair marketplace with competition:

- First, the government should ensure that creators and everyday Americans give effective **consent**, so that we can decide when and where our work is used by AI systems.
- Second, the AI Action Plan should encourage a robust **licensing** marketplace, so that the incentive to create for small businesses is preserved. Our work has immense economic value, so the value generated by that work should accrue to the original creators, not just Big Tech.

- Finally, the AI Action Plan should require **transparency** from Big Tech companies, requiring them to disclose what material is in their training datasets, and label what content is AI generated.

Thank you for the opportunity to comment.
