Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I don't think OpenAI or any other one of these companies with an inflated value is selling anything other than snake oil. But I also think there's nothing that generative AI will do that isn't harmful. These things will either destroy a massive number of jobs all over the world and wreck the economy, make World War 3 happen with fake audio or video or images destroying all intelligence gathering, or both.
