Hello,
reducing roadblocks to AI is a mistake. AI is not a benefit to national security and, in fact, is an active detriment to both national security as well as to the American people. This aggressive push to make it easier for AI tech companies to take advantage of American citizens is nothing more than a greedy ploy to make a small few rich off of the suffering and exploitation of the masses. This plan is shameful and predatory.

Do **NOT** remove copyright protections so AI companies can steal from private citizens. It is theft, plain and simple. I do not want this, the American people do not want this, and neither should the government. AI is inaccurate in ways that fundamentally cannot be fixed, it is inhuman, and it is actively harmful to everyone.

We, as a people, claim to value hard work and effort, but AI does not champion either. It steals the hard work of others so that tech leaders can make more money off of doing increasingly little work. Stop it now.
