Thank you for the opportunity to comment regarding the input of Artificial Intelligence AI and the importance of Science and Technology. For many years, there have been many proven technical styles and mechanical deliveries of machines and online versions of AI. AI has modification of health and technology. As I suggested, artificial intelligence requires initial updating, integration of more medical networks, and having an understanding of our human-like responses and Policies and regulations. It is unclear whether or not AI is a comfortable crossover for diverse people or something to get used to.
