The government has been seized by white supremacists, their wealth shielding them from accountability as they dismantle the very institutions meant to serve the people. The billionaire class, led by Trump and his enablers, are looting the country in broad daylight, cutting vital jobs, gutting essential programs, and consolidating power with impunity. The voices of the American people are ignored, our rights dismantled for the benefit of the wealthy few. They are no longer pretending. They are no longer hiding their white hoods. The white supremacists are in the White House, and they are waging war on the most vulnerable among us. If this continues, we will no longer need to ask how fascism takes hold because we will be living it. This is not the nation we claim to be, we must scream from the rooftops that we will not accept this. Also, only slightly more than 30% of Americans voted for Trump. That means 60% did NOT get his vote. His agenda does not represent the will of all Americans, not even close.
