I'll link some videos which are probably better than reading through long fluffy comments: "Intro to AI Safety, Remastered" by Robert Miles - <https://www.youtube.com/watch?v=pYXy-A4siMw> (An accessible explanation of the argument that strongly-superhuman intelligence poses an extinction risk) There's also this beautiful channel which animates rationalist essays: "The Power of Intelligence" by Eliezer Yudkowsky - <https://www.youtube.com/watch?v=q9Figerh89g> "The Goddess of Everything Else" by Scott Alexander - <https://www.youtube.com/watch?v=Bbwp4PbWYzw>
