I write as a concerned citizen. In the midst of all of these actions stripping Americans of their rights, putting whole classes of people in danger, and wiping out a once thriving economy, this AI Action Plan would be yet another absolutely awful move on the part of the federal government. AI companies must not be allowed to steal from the creative works of every human being, to base their "growth" and "profits" - if they ever truly achieve these - on the collective works of people who will gain no benefit but the continued burning of our planet in pursuit of the next innovation. We can and must do better.
