CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

AI programs are dangerous for the planet and the economy. They use too much water and electricity. Also they are dumbing down society by stunting personal growth while stealing actual creators works. Throw in the fact that copyright law is different for each country. Thus, it is too dangerous to the U.S. economy to constantly deal with lawsuits from within and without. Finally AI programs are just prompt generators that humans are adding to and this means they are not intelligent in any way.
