To Whome It May Concern,

Artificial Intelligence (AI) is destroying everything it touches. It steals the work and lives of the American people and allows corporations or anyone else to profit off of something someone else did.

Things created with AI are soulless copies of a copy. The AI Google search engines have contributed to mass misinformation and the s\$%^ification of daily life. I have been told incorrect information about medication I'm on and health conditions. It can be extremely devastating.

A computer can't do things that a Human can. A computer lacks Humanity and an awareness to live in the physical world that we do.

AI should be Banned as it is destroying everything it touches. Amazon has announced AI on it's Alexa and I will be discontinuing use because of this. I have stopped any service that has opted to use AI.

Sincerely,

William Siefferman
