Hello.

AI is a threat to the livelihoods and security of millions of Americans. It is an immense weight on our power grid. It's potential is dangerous, and it needs to be heavily regulated.

As a professional who has used AI for office work, and creative work, I am largely unimpressed by it. I find it useless for pretty much everything I have used it to produce. The most impressive use cases I have seen for this technology were things that the google search algorithm or translator already did. In times I have used AI to search for information, I have found AI suggested me uninformed and misleading information. Often misrepresenting the sources this technology is sourcing.

This is a gimmicky, fad tech. It's this year's crypto, or NFT. It's a waste of our country's resources, and a threat to the copyrights of our people.

Do not fund AI.
Regulate AI heavily.

Thank you.

Casey Daniels
