My name is Patrick Cash Hartzell. I work in the creative fields as a producer of television and film as well as a writer for many genres and mediums. This act would threaten my employment and the employment of my peers. It also threatens to disrupt the passive royalties that has allowed the industry to exist. Also the people that own and develop this technology are for the most part, assholes and don't deserve any success. Their continued success has marked the end of a time of prosperity in America. To have a class that doesn't just not contribute anything but actually sucks the work of others like blood to make themselves richer is anti American and frankly anti-evolutionary.

I also worry that in disemploying the entire creative class and forcing them into poverty would make a violent revolution much more palatable to the American people. And since the names of the people running this scam, both on the government side and the private sector, are in the public, I'm fairly sure some of you may be signing your own death/torture/dismemberment warrant. Some of history's worst monsters and torturers were stymied creators. Just one individual not getting into art school led to million and millions dying in the holocaust. Can you imagine what an entire generation might get up to? I hope we never get there. By allowing copyright to stand and shutting down this proposal, I believe that we might avoid this great evil.

Also if the s^&* I just wrote can be used without attribution, why did you need my name?
