To Whom it May Concern,

I am writing to propose the establishment of a "National AI Data Consortium" that leverages citizen participation to aggregate and curate high-quality datasets for artificial intelligence (AI) training. This initiative aims to address the critical data scarcity hindering AI advancement and to foster a sense of national contribution among citizens.

The Challenge: Data Scarcity in AI Development:

Artificial intelligence relies heavily on vast amounts of high-quality data for training and refinement. However, there is a significant shortage of such data, which threatens to slow the rapid pace of AI advancement. A report by Pymnts.com highlights that data scarcity is a major obstacle to AI innovation, potentially impeding progress in various sectors.

The Proposal:

Citizen-Driven Data Collection:

To overcome this challenge, I propose the creation of a national consortium that:

- **Aggregates and Curates Data:** Collects diverse datasets from various sectors, including healthcare, education, and public services, ensuring they are anonymized and privacy-protected.
- **Incentivizes Citizen Participation:** Encourages citizens to contribute data through rewards such as tax breaks, micro-payments, or gamified platforms, thereby fostering a sense of national contribution.

Benefits of the Consortium:

- **Enhanced AI Development:** Access to comprehensive datasets will accelerate AI training, leading to more accurate and effective models.
- **Economic Growth:** AI has the potential to create 133 million new jobs by 2030, with specialized roles in AI and big data expected to grow by 30-35%.
- **Empowered Citizens:** Engaging the public in data collection empowers individuals and communities, promoting shared responsibility.

Conclusion

By establishing the National AI Data Consortium, we can harness the collective power of our citizens to propel the United States to the forefront of AI innovation. This initiative not only addresses the pressing need for quality data but also cultivates a collaborative spirit that benefits all.

Thank you for considering this proposal. I would be more than happy to assist with bringing this plan to fruition.

Sincerely,

Chad Brewer
