Christina Knotts

Please do not contract AI to Elon Musk or any of his companies. It's very clear he wants all of our data and it is also clear that he does not have pure intentions for this. He also acts as though he is above the law, which means he operates without fear of accountability. Please do not hire Elon Musk or any of his companies for this. Please do contract/hire multiple companies for these projects and require each have strong security and ethics programming. Please do not put all of our data into the hands of one entity. Please only contract to companies that have been thoroughly vetted and are trusted for this... do not contract to Elon Musk, Peter Thiel, or any of those entities who wish to gut our systems and remake America. We don't need or want ideology baked into AI.
