Subject: [External] Upcoming AI/copyright ruling
Date: Sunday, March 16, 2025 12:10:05 AM

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

It's already been established that AI materials cannot be copyrighted. If AI is training on copyrighted material then what benefits are the users of AI getting? They are stealing work to train models that in turn can be stolen from leading to a cascade of worthless products and properties.

As a business model, this seems pathetic and highly unprofitable. You are also devaluing existing properties held by corporations and individual business persons.
