Good evening,

I am writing to express my opposition to executive order regarding AI. AI steals intellectual property from writers, artists, and other creators, which should not be allowed. It is also a burden on the environment, draining energy, water, and other precious resources. Furthermore, studies have shown the negative impacts on people and animals living in close proximity to AI data centers. The reckless use of AI, by individuals and the government, will only have negative impacts on our world.

“This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.”

Adding that last bit because of the Federal Register requirements.

Thank you,
Dabney Kinser
