Subject: [External] AI Action Plan
Date: Sunday, March 16, 2025 12:55:02 PM

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

AI has failed to demonstrate any acceptable use without fair compensation and safety. It should not be prioritized until it has done so.

Any policy must prioritize compensation of original creators and copyright holders over model builders. Training must Be accompanied with an attestation of the right to use said material for that purpose.

Any policy for image and multimedia must prioritize safety to children and privacy over access to generation technology. Safeguards against involuntary pornography must be in place.

Academic and managerial assistants must prioritize and achieve accuracy before being used in any advisory role. See the mistakes in legal bots and medical advice engines that are already afflicting the courts and our lives.

Without this, AI is less than useless. It is actively harmful.
