TWIMC,

To be a global leader in AI, the U.S needs to incentivize the best and brightest to work here in America on American problems. I propose a simple solution:

Create a worldwide job offer:

1.) Incentives

- Tax free bonus \$500k per year \$100k a year guaranteed (similar to a military enlistment bonus, only TAX FREE)

- Guaranteed work visa, glide path to U S. citizenship

2.) Criteria

- Must have a proven novel use of machine learning or AI that solve(s/d) a complex industry problem

- Must agree to work for DoD R/D organization such as DARPA, Navy Research Laboratory, Idaho National Lab, etc.

- Must be willing to relocate and if not already a U.S. citizen, swear oath of office and/or pass clearance requirements

Very respectfully,
David Williams
